

## Mobile Audiometric Testing

OCCUPATIONAL HEALTH

**T**he EI Group, Inc. (EI) has earned a reputation for professionalism nationwide through quality mobile audiometric testing services. Our fleet of mobile audiometric testing vehicles employ state of the art technology in a clean, comfortable setting designed to help you comply with OSHA's Hearing Conservation Standard (29 CFR 1910.95).

EI technicians who have successfully completed a CAOHC-approved hearing conservation course and are under the supervision of a licensed, Certified Audiologist conduct all on-site audiometric testing on EI's mobile audiometric testing units. All testing and calibration procedures, as well as recordkeeping, are in compliance with applicable OSHA and other regulatory requirements. Upon completion of the testing, data is returned along with interpretation of test results. Employees are tested in groups, with each group session lasting approximately 15-20 minutes.

Our mobile audiometric testing services offer:

- » Large, clean, comfortable testing areas
- » All tests conducted with Monitor MI-5000 microprocessor audiometers in I.A.C. test booths
- » OSHA-required calibration checks conducted daily
- » Experienced, CAOHC-certified technicians
- » All test results reviewed by an experienced, Certified Audiologist
- » Easy-to-understand employee and management reports returned promptly to you
- » Excellent attenuation of ambient noise during testing
- » Flexible scheduling to meet your needs
- » Test results available online through our data management system, AudioAssessor<sup>®</sup>

# MOBILE

Audiometric Services

EI's hearing conservation staff consists of Certified Audiologists, Certified Occupational Health Nurses, CAOHC Certified Occupational Hearing Conservationists and Information Technology support staff. Our long list of satisfied clients is a continued testament to the quality of the EI's service and references are available readily upon request.

### Testing Capabilities

EI is capable of testing employees in groups of six (6), in 15-20 minute shifts to maximize efficiency for multi-shift scheduling needs or requirements.

### Hearing Conservation Education

If requested, EI provides employee hearing conservation training in accordance with OSHA guidelines and recommendations from the National Hearing Conservation Association. EI provides this training in form of a video (in both English and Spanish) shown on our mobile unit prior to administration of the audiometric test.

### Recordkeeping

EI's data management program, AudioAssessor<sup>®</sup> is second to none in maintaining and providing analysis for employee audiograms. Test data and reporting capabilities are available to designated client personnel wherever an internet connection is available at [www.AudioAssessor.com](http://www.AudioAssessor.com).

"I've enjoyed working with your technician on both occasions he has been to our plant. I'm enjoying the professionalism your company provides my safety program."

- EHS Manager, Lumber Mill

"The EI Team did an outstanding job. Thank you! We look forward to doing business with you next year."

- Safety Manager, Aerospace Industry

"In the past 22.5 years I have worked here, this was the best explained hearing test I have ever been involved in. The attendant was professional and explained in depth information at a level our entire staff could understand."

- Shift Leader, Paper Industry
